

Testing, Inspection & Certification Solutions

Technology

- Microsoft .NET Application w/ MSSQL Database Backend
- Android/iOS/Windows Mobile Technology
- **Secure Connections-** When you log into Versentia, you are connected via a 256 bit extended-validation SSL security certificate. This type of secure connection is comparable to the online security provided by many major banks and financial institutions. You can verify that you are indeed connected to Versentia via a secure connection. When you're logged in, your browser bar will display either a green bar or a lock icon near the web address.
- **Secure Data Centers**—Versentia data is stored in SoftLayer© (an IBM Company) Data Centers. SoftLayer© security procedures utilize industry best practices from sources including The Center for Internet Security (CIS), Microsoft, and Red Hat and more.
- **Redundant backups-** We back up our entire database every 6 hours in multiple geographically redundant locations. This ensures your data is safe and secure no matter what happens.
- **Data Segregation-** Versentia uses data segregation to protect its data from competing companies on the same platform without any coding involved. Once a parent database is created, all locations & contact information entered would only belong to that database.

Industries/Markets Served

- Equipment/Asset Tracking
- Testing Laboratories and Agency Verification Testing.
- Equipment Safety Inspection Tracking (Jurisdictional Inspections)
- Concrete & Materials Production Tracking, General and Project Specific
- Phase 1 & 2 Environmental Site Assessment
- QC/QA
- Government, Cities & Municipalities

Mobile Field Application

- Android, iOS & Windows applications for varied deployment
- Intuitive (intelligent) inspection checklists for ease of use
- Sync option allows for on demand updates while in the field
- Photographs taken via tablet synced to service record and reporting back on cloud
- Document upload capability for inspector to utilize
- Mapping and traffic technology available to inspectors
- Advanced GPS technology allows for route efficiency checking

- Locations
- Clients**
- Billing
- Invoices
- Routing
- Calendar
- Service Queues
- Subscription Queues
- Reports
- Filings
- Sales
- Requested Locations
- Inquiries
- Dashboard
- Administration

Customer Relationship Management

- Built upon a client centralized system with location management & service management
- Multiple equipment & service inventory
- Subscriptions for automatically renewed services
- Client/service/region specific fee schedules
- Extensive historical record access to activities & notes
- Scanned Document Management
- E-mail Communication History

-  Administration

Dashboard & Management Reporting

- Dashboard geared towards Department Preference to ensure up to date information
- Daily, Weekly, Monthly & Quarterly reports delivered to inbox
 - Morning Report Covering All Aspects of Prior Day
 - Operational Service Summary
 - Routes & Scheduling Summary
 - Performance Graph Summary
 - Service Pipeline Summary

Client Reporting & Communications

- Automated reporting for clients with results from services performed
- Generation of site specific forms from data collected
- Customized database queries for created reports
- Client Access For Location Entry, Scheduling & Reporting

The screenshot displays the VerSentia Client Access web interface. At the top, the VerSentia logo is centered, with the tagline 'DATA MADE SIMPLE' below it. To the right of the logo is a 'Log In' button. Below the logo, the text 'Client Access' is displayed. The main visual is a photograph of a construction worker wearing a blue hard hat and a grey vest, looking down at a set of blueprints on a construction site. Below the photograph, there are three feature cards, each with a blue circular icon and a title:

- Instant** (lightning bolt icon): Manage all your locations with lightning fast speed.
- Depth** (document icon): Access to all your object's information, from the location down to the next service date.
- Add Info** (pencil icon): Update your location's info from anywhere, even from your mobile phone!

The VerSentia logo and tagline are also visible in the bottom right corner of the interface.

Scalability of Technology Platform

- Extensive Administration Controls Over Company Settings
- Multiple Equipment Types & Service Types, Customizable By End User
- Parent/Child Company Capabilities
- Stress Tested With 1000 Active Sessions & 40,000 Concurrent Requests, System Usage Does Not Exceed 15% of CPU On Average
